	Q. Area Closure	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

Moderate fire spread anticipated. Interior fire activity in Div V. Creeping is expected on Div W from the burnout 12 hours:

yesterday continuing to move uphill toward the fire edge.

24 hours: Moderate fire behavior 48 hours: Minimal fire behavior 72 hours: Minimal fire Behavior Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Continue direct line construction in Div V. Mop up operations in Division W. Maintain regular communication with affected public, local agencies, and government officials keeping them informed of fire status and management efforts. Greater sage grouse habitat and crucial mule deer winter range are the focus of suppression efforts. Keep fire north of Dairy Valley, west of Iverson Ranch, south of Spring Creek Reservoir and east of the Grouse Valley Road. Manage the incident costs commensurate with the values at risk.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Until fire is contained/controlled, threat to the following areas will remain: Sagebrush Focal Areas (SFA), Priority Habitat Management Areas (PHMA) for Greater Sage-Grouse (GRSG), crucial mule deer winter range,

Yellowstone Cutthroat fisheries habitat, The Historic California Trail, T&E plant species (Goose Creek Milkvetch), Ruby pipeline, public and private livestock grazing allotments, and communications sites.

Until fire is contained/controlled, threat to the following areas will remain: Sagebrush Focal Areas (SFA), Priority 24 hours: Habitat Management Areas (PHMA) for Greater Sage-Grouse (GRSG), crucial mule deer winter range,

12 hours:

Incident: Goose Creek

Yellowstone Cutthroat fisheries habitat, The Historic California Trail, T&E plant species (Goose Creek Milkvetch), Ruby pipeline, public and private livestock grazing allotments, and communications sites.

Until fire is contained/controlled, threat to the following areas will remain: Sagebrush Focal Areas (SFA), Priority Habitat Management Areas (PHMA) for Greater Sage-Grouse (GRSG), crucial mule deer winter range,

48 hours:

Yellowstone Cutthroat fisheries habitat, The Historic California Trail, T&E plant species (Goose Creek Milkvetch), Ruby pipeline, public and private livestock grazing allotments, and communications sites.

Until fire is contained/controlled, threat to the following areas will remain: Sagebrush Focal Areas (SFA), Priority Habitat Management Areas (PHMA) for Greater Sage-Grouse (GRSG), crucial mule deer winter range,

72 hours:

Yellowstone Cutthroat fisheries habitat, The Historic California Trail, T&E plant species (Goose Creek Milkvetch), Ruby pipeline, public and private livestock grazing allotments, and communications sites.

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: 2 type2 IA crew needed to replace crews timing out 24 hours: 2 type2 IA crew needed to replace crews timing out

48 hours: **None** 72 hours: **None**

Anticipated after 72 hours:

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Hot and dry weather conditions coupled with gusty winds, and high fine fuel loading still remain. Livestock still remain with the fire perimeter and surrounding area. The fire is burning in a Sagebrush Focal Area for GRSG, selected by the USFWS as being the best of the best for GRSG habitat. The fire is burning in 3 major watersheds that feed into Goose Creek which supports a population of Yellowstone Cutthroat Trout. The fire also continues to impact local ranches by removing forage for their livestock which supports their livelihoods.

41. Planned Actions for Next Operational Period:

Continue direct line construction in Div V. Continue mop up operations in Division W. Suppression repair is taking place in all divisions.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"): 132,220
- 43. Anticipated Incident Containment or Completion Date: 08/12/2018
- 44. Projected Significant Resource Demobilization Start Date: 08/06/2018
- 45. Estimated Incident Costs to Date: \$6,300,000.00
- 46. Projected Final Incident Cost Estimate:
- 47. Remarks (or continuation of any blocks above list block number in notation):

Transfer of Command from Great Basin Team 2 (DeMasters) to Nevada Type 3 Team (Rhea) took place today 8/6 at 0600.

Utah Nevada Total Percent Private 28,536 25,238 53,774 40.67%

State 7,311 0 7,311 5.53%

Incident: Goose Creek

BLM 32,584 38,551 71,135 53.80%

Totals 68,431 63,789 132,220 100.00%

Fire has assumed command of the China Jim fire for 20,000 acres and the Wagon Box fire for 300 acres. Those totals are included in the current acreage for the Goose Creek fire.

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
